PRIYANSHU GUPTA

9528279509 | guptapriyanshu9412@gmail.com | Portfolio Website

EDUCATION

MSc. Computer Science - Department of Computer Science, University of Delhi | 2027
BSc. (Hons.) Computer Science - PGDAV College, University of Delhi | 2024

TECHNICAL SKILLS

Languages: Python, SQL
Machine Learning: Regression, Classification, Random Forest, KMeans Clustering, Ensemble Learning, XGBoost, Recommender Systems
Data Science: Pandas, NumPy, Scikit-learn, Data Visualization
GenAI / NLP: RAG, LLMs, Prompt Engineering, Gemini, GPT, FinBERT, spaCy
MLOps / Deployment: MLflow, GitHub Actions, Docker, FastAPI, Streamlit, Pandera
Cloud / Tools: AWS, Azure, Git, Jupyter, VS Code

PROJECTS

Movie Mind Reader - BERT4Rec Recommendation System | Live Demo

- Built BERT4Rec Transformer using PyTorch on **32M ratings** with a Kaggle T4 GPU, achieving **Precision@10: 20.57%** and outperforming SVD in an MLflow-tracked comparison before production promotion.
- Engineered weekly retraining with GitHub Actions, Evidently AI drift detection, and Pandera schema validation, enabling automated model promotion with no manual retraining.
- Deployed a gamified Streamlit app on AWS EC2, backed by FastAPI + Docker + S3, delivering real-time next-movie predictions across **54K+ movies**.

AI-Assisted Credit Risk Platform | Live Demo

- Developed an end-to-end credit risk platform using XGBoost, SHAP and Gemini Flash, from PDF extraction to automated underwriter reports.
- Trained XGBoost on **391K LendingClub records**, achieving **ROC-AUC 0.742**, generated per-application risk explanations with SHAP.
- Built automated document field extraction and fraud detection with **34 extracted financial fields** and **13 deterministic checks**, followed by policy-based routing and automated PDF report generation.

AuditLens: AI-Assisted ESG Claim Auditing | Live Demo

- Built ESG claim extraction from SEC 10-Ks using spaCy sentence segmentation and FinBERT classification at a **0.80 confidence threshold**, with SHAP token-level attribution on FinBERT generating explainability narratives fed into Gemini audit observations.
- Built a FAISS-based RAG (Retrieval-Augmented Generation) system over GRI, TCFD, SASB and ISSB standards using sentence-embedding similarity, with a custom Gemini fallback chain for structured audit observations.
- Engineered a **3-layer verification pipeline** covering internal filing logic, YoY SEC EDGAR comparison and FAISS standards grounding, deployed on Azure Container Apps via Docker + GitHub Actions.

EXPERIENCE

AI Trainer (Freelance) - Turing & Outlier | Sep'24 - Present

- Evaluated **2,000+ AI responses** for Meta and OpenAI projects with **95% accuracy**; analyzed **1,000+ paired responses** and identified quality gaps.
- Reviewed and refined **1,000+ prompts/responses** across **5+ AI training projects** spanning mathematical reasoning and SOTA evaluation, identifying **50+ model weaknesses** and edge cases.
- Crafted **500+ solutions** and designed **300+ prompts**, contributing to a reported **25% improvement** in query-handling efficiency and response quality.

HCDS Technologies, Gurgaon - Data Analyst Intern | Jun'24 - Sep'24

- Analyzed **10,000+ records** using Python and created **5-6 visual reports** to communicate analytical findings.
- Presented findings to non-technical team members and stakeholders, translating data patterns into clear, actionable business recommendations.
- Conducted **2 workshops for 20-30 students** and supported updates to 8–10 webpages.

LEADERSHIP & ACTIVITIES

- **President**, Delhi University Computer Science Society, led the team in organizing and conducting Sankalan 2026, the department's annual fest. Organized a departmental trekking trip to Madhyamaheshwar temple of 72 persons.
- Organized and conducted several departmental events with the society team.
- Secured **₹3 lakh sponsorship** for the department's tech fest. Conducted workshops on Python and Web development.
